

18 JUN 1985

Letter Sent to All Members of the CIA Traffic Advisory Committee

Dear

I would like to thank you for your participation and support at the 8 May public briefing on road improvements for Routes 123-193.

By most accounts the briefing went well. There can be no doubt that the primary goal of the briefing, that is, providing the opportunity for public query and comment, was met.

Although I believe that most of the public's concerns and questions were responded to adequately at the meeting, the issues of landscaping, berms, traffic light synchronization, construction period traffic flow, and merge lanes warrant your assurance to the organization you represent that each of these points will be subject to the project's 25, 60, and 90 percent design review.

Attached for your information are copies of two letters. One was sent by the Central Intelligence Agency to the Commonwealth of Virginia requesting that they proceed with the design of Route 123 road plan Alternative 2 and their response to this request.

Thank you again for your efforts. I look forward to meeting with you again in the near future.

Sincerely,

[Redacted Signature]

Chairman, CIA Traffic Advisory Committee
